

PREETAM BASAVARAJ KAMBAR

Cloud & DevOps Engineer (Entry-Level)

+91 72599 27098 | pritamkambar4@gmail.com | Portfolio: preetamkambar.cloud | GitHub: [PreetOm](https://github.com/PreetOm) | LinkedIn: preetam-b-kambar

PROFILE SUMMARY

Cloud & DevOps engineer entering the field with hands-on delivery experience: designed and shipped a live AWS pipeline completing full build-to-release cycles in under 90 seconds with zero manual steps. Trained across AWS, Docker, GitLab CI/CD, and Linux through a formal certification path anchored by AWS Cloud Practitioner. Comfortable operating within SDLC-driven, client-facing delivery models, with an automation-first approach ready to apply to an entry-level Cloud/DevOps role supporting cloud migration and infrastructure automation work.

CORE COMPETENCIES

- **Cloud Platforms:** AWS (EC2, S3, IAM, VPC); Cloud Computing Fundamentals (multi-cloud aware — Azure/GCP concepts)
- **DevOps & Automation:** CI/CD Pipeline Engineering (GitLab CI/CD), Docker Containerization, Kubernetes Fundamentals, Infrastructure Automation
- **Systems & Delivery:** Linux Administration, Nginx Reverse Proxy Configuration, SSH/Secure Access Management
- **Client-Ready Skills:** Structured Training & Rapid Upskilling, Cross-functional Collaboration, Clear Technical Communication, SDLC-Aligned Delivery
- **Languages & Tools:** Java, Python, C, SQL, HTML, CSS, Node.js, Git/GitHub, MS Office

PROJECTS

HOOBANK Deployment Project | AWS · Docker · GitLab CI/CD · Nginx

May 2026

- Engineered a production CI/CD pipeline from the ground up for a Vite-based web application, cutting the full build-to-deploy cycle to under 90 seconds (1 min 14 sec) with zero queue delay.
- Containerized the application with Docker and provisioned it on AWS EC2, configuring Nginx as a reverse proxy to serve live traffic on a public domain.
- Replaced manual release steps entirely with an automated GitLab CI/CD workflow, enabling on-demand, repeatable deployments to production.
- Locked down server access through SSH key-based authentication and Linux CLI hardening, closing off password-based entry points.

CI/CD Automation Project | React · GitLab CI/CD

April 2026

- Consolidated a React application's build, test, and deploy stages into a single automated GitLab pipeline with no manual checkpoints.
- Carried the same automation-first pipeline design forward into the HOOBANK deployment — establishing a repeatable personal approach to release engineering.

INTERNSHIP EXPERIENCE

Cloud DevOps Intern | Softmusk Info Pvt. Ltd.

Jan 27 – May 9, 2026

- Completed a hands-on Cloud & DevOps training track covering AWS, Docker, GitLab CI/CD, and Linux inside a live engineering environment.
- Partnered with the engineering team on deployment and automation tasks, applying training concepts directly to real infrastructure work.

EDUCATION

Bachelor of Engineering in Computer Science | SG Balekundri Institute of Technology, Belagavi, India | CGPA: 7.67

2022 – 2026

Pre-University Course (PUC II) | LJ Holi PU College, Gokak, India | 83.00%

2022
